REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and citizens of the Town of Greenwood:

I herewith submit my sixth annual report of the schools and school property of this town.

The school conditions have not changed to any great extent from the previous years. The affairs of the school department have been administered as economically as possible.

The schools opened for the fall term with only two changes in the teaching staff. Miss Mary Martin was engaged to teach the Greenwood Center School and on account of the opening of the new room at the Lockes Mills school Mr. George Wakefield was elected to fill the position in the middle grades. Even with reduced salaries the morale of the schools and the enthusiasm of the teachers has not abated.

The registration in the Common Schools is about the same as in the previous years but the High School attendance has fallen below the average of the past two years. The High School attendance will be increased another year as a larger class than usual will be graduated from the Common Schools.

With the help of funds obtained from the Civil Works Administration to the amount of \$3,196.10 for labor, and \$686. for materials, an extension was built on the two-room building in Lockes Mills comprising a concrete basement and an additional school room. This addition provides a large, light room for the three upper grades, with a seating capacity of forty, filling a need which has been evident for a number of years. With the opening of this room we were able to group the children so that each teacher would have three grades. Miss Gladys Salls has the sub-grade, first and second grades with a registration of twenty-five; Mr.

George Wakefield the third, fourth and fifth grades with a registration of twenty-four; and Mrs. Louvie Coffin, Principal of the building, the sixth, seventh and eighth grades with a registration of twenty-eight. A new heating plant has been installed which has proven itself able to heat the building in the coldest weather.

Through the kindness of Dr. F. E. Hanscom, Principal of Gould Academy, and the trustees of that institution, seats from the old Academy building were presented to the School Department of the Town of Greenwood, sufficient to more than furnish the required number for the extra room. Single seats have also been placed in the Greenwood Center school.

At the present time four rural school buildings are being painted inside with funds obtained from the Emergency Relief Administration. This means that all of the school buildings will be in good condition by the first of March. With the fuel at the Lockes Mills school taken care of in the basement it leaves an unused shed which should be remodeled into a more modern toilet system as the present one is both inadequate and unsanitary.

The Health work has been carried on as in the past two years with a school nurse from the State Department of Health visiting the schools at various times during the year and making suggestions of a helpful nature to the parents and pupils.

We regret that the funds for milk, furnished last year by the Civil Works Administration for undernourished children, were discontinued. At the present time soup, etc., is being supplied to supplement the lunches of the pupils, the materials being provided by the Emergency Relief Administration.

The schools are fairly well supplied with textbooks. New geographies for the middle grades, arithmetics for the eighth grade, and a set of reference books have been purchased. Only with the greatest economy are we able to meet the needs of this department with our present appropriation.

It is very pleasing to note from the reports of Gould Academy and High Schools, that our students in these various institutions are maintaining a very satisfactory standard. The questionnaires sent to these schools report that the failures of any student in any subject are caused by lack of interest and work on the part of the pupil rather than lack of preparation from our school system. With the larger enrollment in the Freshman class another fall it will be necessary to appropriate \$500. more in the school fund. This can be done without increasing the appropriation for all school purposes as less will be needed in the repair account for the coming year.

Following are statistics regarding the teachers:
